# NEXUS ELEMENTS OILFIELD TRADING EST

OIL AND GAS INSTRUMENTATION

## YOUR PARTNER IN PRECISION

Your trusted source for industrial instrumentation and certified calibration services.

Serving Oil & Gas, Power, and Process Industries with reliable, high-performance solutions.

Accuracy. Safety.  
Performance — Delivered.

**NEXSOIL**

FOR INSTRUMENTATION & TECHNICAL SERVICES

# WHO WE ARE & WHAT WE DO

Nexsoil is a Saudi-based company specializing in the supply and trade of premium industrial instrumentation and calibration equipment. With a strong foundation built on technical excellence and industry knowledge, we serve as a trusted partner to businesses across a wide range of sectors.

Our experienced team is dedicated to delivering dependable, accurate, and innovative solutions tailored to meet the specific needs of each client. From initial consultation to after-sales support, we are committed to ensuring quality at every step.

Driven by our core values—innovation, precision, and integrity—we continuously invest in the latest technologies and industry best practices. This commitment empowers us to not only meet but exceed customer expectations, offering long-term value and reliable performance.

Over the years, Nexsoil has earned a reputation for its reliability, customer-centric approach, and unwavering focus on excellence. Whether supporting a critical process or improving operational efficiency, we provide solutions that contribute directly to our clients' success.

## OUR **MISSION & VISION**

### MISSION

To provide precise and reliable industrial instrumentation solutions that enhance operational efficiency, safety, and productivity for our clients.

### VISION

To become the most trusted and preferred partner in instrumentation and calibration across the Middle East—recognized for our commitment to quality, innovation, and service excellence.

# Why Choose Nexsoil?

1

High-quality, certified instrumentation products

2

Expert technical consultation and support

3

On-time delivery with dependable after-sales service

4

Competitive pricing without compromising quality

# INDUSTRIES WE SERVE

Empowering critical sectors with precise instrumentation and calibration solutions

## Oil & Gas

- We provide robust instrumentation solutions that withstand extreme conditions, ensuring safe and efficient exploration, refining, and distribution processes in the oil and gas sector.

## Petrochemicals

- Our instruments help maintain process stability, pressure, and temperature control, essential for quality production in petrochemical plants.

## Power & Energy

- **Nexsoin** supports conventional and renewable energy facilities with accurate measurement and monitoring tools for uninterrupted power generation and grid stability.

## Water Treatment

- We deliver reliable flow, level, and pressure monitoring devices for water purification, desalination, and wastewater treatment systems.

## Manufacturing

- Our solutions enhance production efficiency, product quality, and safety across various manufacturing environments, from automotive to heavy machinery.

## Food & Beverage

- We offer hygienic and precise instruments compliant with industry standards for temperature, pressure, and flow control in food and beverage processing.

## Pharmaceuticals

- Critical measurement tools for sterile environments, ensuring precise process control, regulatory compliance, and product safety in pharmaceutical production.

# Pressure Gauge

1

## Project requirements & specifications

Clear specifications for reliable and efficient project execution.

2

## Customized offering

Tailored solutions designed to meet your specific project needs.

3

## Customized documentation packages

Comprehensive documentation tailored to client and project requirements.

4

## Overall project management

End-to-end project coordination ensuring timely and quality delivery.

5

## Inspection

Thorough inspection ensuring product quality and compliance.

6

## Logistics

Efficient logistics ensuring on-time delivery and reliability.

# Our Service Capabilities

01

## Pressure Gauge

High-accuracy pressure gauges, transmitters, and switches for monitoring gas and liquid pressures in demanding industrial environments.

02

## Safety Relief Valves

Capacitance, radar, ultrasonic and float-based level instruments to measure liquid levels in tanks and reservoirs.

03

## Bi-Metal Thermometer

Durable bi-metal thermometers designed for accurate and reliable temperature measurement in industrial applications.

04

## Differential Transmitter

High-performance differential transmitters designed for precise pressure measurement and process control in industrial applications.

05

## Thermometer

Accurate temperature measurement for industrial and process applications.

06

## Electrical Instrumentation

Supply and configuration of electrical measuring devices including voltage, current, resistance, and signal converters – ensuring reliable performance and integration.

# PRODUCT PORTFOLIO OVERVIEW

## Pressure Instruments

Pressure Gauges,  
Transmitters, Switches

## Pressure sensors Baumer

Reliable Baumer sensors  
for accurate monitoring.

## Flow Meters

Electromagnetic, Orifice  
Plate, Ultrasonic Meters

## Level Gauges

Radar Level Transmitters, Float &  
Ultrasonic Gauges

## Calibration Equipment

Pressure Calibrators, Signal  
Simulators, Deadweight Testers

## pressure relief valve

Engineered to maintain system  
integrity under high-pressure  
conditions.

## Our Project

Delivering Precision,  
Reliability, and  
Results

Nexsoil has successfully executed multiple projects across the Oil & Gas, Power, and Industrial sectors – providing high-performance instruments, certified calibration services, and on-site testing solutions.

Our team's technical expertise and commitment to quality ensure that every project meets international standards and client expectations. We take pride in offering end-to-end solutions – from instrumentation supply and installation to calibration, maintenance, and performance testing.

Each project reflects our core values of precision, safety, and customer satisfaction.

**Nexsoil – powering industries with precision and performance.**

**NEXSOIL**  
FOR INSTRUMENTATION & TECHNICAL SERVICES

# CALIBRATION & TESTING SERVICES

At NEXSOIL, we offer precise calibration and testing services for a wide range of instruments, helping industries maintain accuracy, safety, and compliance with international standards.

## WE OFFER CALIBRATION SERVICES FOR :

### ✓ **Pressure Instruments**

Calibration of pressure gauges, transmitters, and switches using certified standards.

### ✓ **Temperature Sensors**

RTDs, thermocouples, indicators calibrated for accuracy in various temperature ranges.

### ✓ **Flow Meters**

On-site and lab-based flow meter calibration for liquids and gases.

### ✓ **Electrical Equipment**

Multimeters, signal simulators, and process calibrators adjusted to precision.

### ✓ **Mechanical Devices**

General mechanical calibration tools including weighing and dimensional gauges.

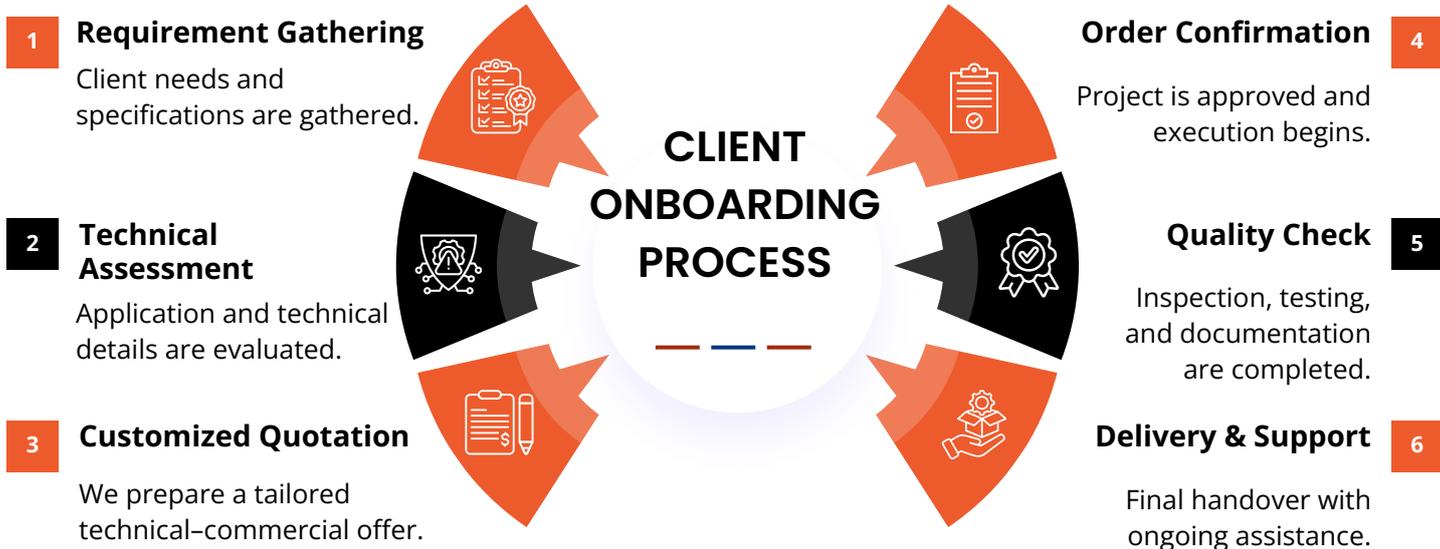

## Key Service Highlights

- On-site & In-house calibration options
- Controlled environment calibration laboratory
- Experienced team of trained calibration engineers
- Traceable certificates and reports provided

**NEXUS ELEMENTS OILFIELD TRADING EST**

**CLIENT BENEFITS**

**What You Gain with Nexsoil**

- Faster project execution
- Clear technical communication
- Accurate and compliant instrumentation
- Smooth coordination from start to finish

**Our Support Promise**

We provide responsive communication, technical clarity, and end-to-end assistance to ensure every project runs smoothly and efficiently.

**Why Our Process Works**

A structured workflow, skilled engineering support, and strict quality controls ensure every client receives reliable and consistent results – every time.

**NEXSOIL**
